Summary

MERN Stack Developer passionate about building full-stack web applications with a focus on performance, scalability, and maintainable code. Skilled in MongoDB, Express.js, React.js, Node.js, TypeScript, and modern development tools. Strong foundation in computer engineering with hands-on experience in AI-powered projects, REST APIs, and responsive UI design. Committed to continuous learning, collaboration, and delivering high-quality software solutions.

Work Experience

MERN Stack Web Developer Intern | Digilians Jan 2026 – present

Currently undergoing a 590-hour intensive full-stack development program focused on real-world applications.

- Building hands-on full-stack projects using MongoDB, Express.js, React.js, and Node.js.
- Developing RESTful APIs with authentication and middleware implementation.
- Applying Redux and Context API for scalable state management.
- Practicing Git workflows within a structured team environment.
- Learning Docker fundamentals for application containerization.
- Following clean code principles and writing basic unit tests.

React Frontend Web Developer Intern | Digital Egypt Pioneers Initiative (DEPI) July 2025 – Dec 2025

- Developed 3 responsive React applications using Bootstrap.
- Improved page load speed by 20% using component optimization.
- Collaborated within a cross-functional team of 4 developers to deliver multiple projects, strengthening teamwork, problem-solving, and time management skills.

Education

Bachelor's degree in Computer Engineering | Faculty of Engineering, Al-Azhar University (2020 – 2025)

Grade: Very Good with Honors

Graduation Project: E-Proctor System – Grade: Excellent

Projects

E-Proctor System | Graduation Project

- Built AI-powered proctoring system detecting cheating with 85%+ accuracy
- Implemented real-time monitoring using TensorFlow.js
- Reduced manual monitoring effort by 60%
- Handled live camera feed processing with performance optimization

Technologies: React.js, Node.js, MongoDB, TensorFlow.js

Matjer | E-Commerce Frontend Project

Developed a responsive E-commerce frontend application simulating a real online store experience.

Technologies: React.js, JavaScript (ES6+), Bootstrap.

- Built responsive product listing and product details pages.
- Implemented shopping cart with dynamic price updates.
- Added product filtering and search functionality
- Integrated mock API / Fake Store API for dynamic data rendering
- Designed clean and user-friendly UI following UX principles
- Applied reusable components and structured folder architecture

Skills

Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, Bootstrap, Tailwind CSS, React.js.

Back-End: Node.js, Express.js, MongoDB.

Tools & DevOps: Git, GitHub, Docker (Basics).

Other: REST APIs, Middleware, Context API, Redux, Unit Testing, UX/UI Principles, Prompt Engineering.

Languages

- Arabic: Native
- English: Upper-Intermediate
